inflow.ai

INDUSTRY SOLUTION

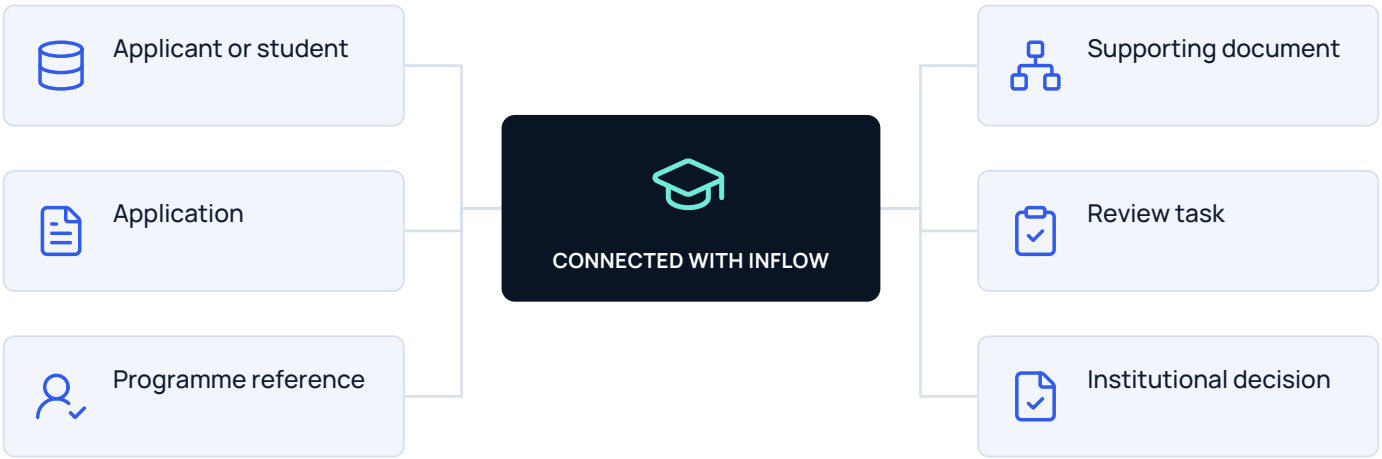

Inflow for Education

Connect the administrative journeys around learning.

Coordinate applicant information, student services, documents and institutional approvals. Design clear journeys across admissions administration, academic services and shared operations while keeping institutional decisions with responsible people.

CONNECTED INDUSTRY CONTEXT

The information behind the next action.

Illustrative industry information model

An institution's service journey often crosses an applicant or student, an administrative office, an academic reviewer and several records systems. A connected case makes information requirements and review ownership explicit without treating AI assistance as an admissions or academic authority.

INDUSTRY OPPORTUNITIES

Six journeys. One connected platform.

Configure the information, decisions and handoffs around the work your teams are responsible for.

Admissions administration

Collect application information and required documents, coordinate completeness review and route the case to institutional decision makers.

A structured application record with visible pending requirements.

Interface Designer / Lifecycles / Document management / Human tasks

Student service requests

Connect enquiries, supporting records and service-team tasks for administrative requests across channels.

A shared service case with a clear owner and next action.

Business applications / Data models / BPM / Integrations

Academic approval coordination

Route institution-defined requests, relevant information and review tasks to authorized academic staff.

A traceable administrative route for academic consideration.

Rules engine / Human approvals / Document management / Lifecycles

Scholarship administration

Organize submitted information, administrative prerequisites and committee review according to an institution-defined process.

A prepared case for authorized evaluation, not an automated award decision.

Interface Designer / Rules engine / AI agents / Human tasks

Faculty and staff services

Coordinate internal requests, supporting documentation, assignments and approvals across shared-service teams.

Connected institutional operations beyond separate email requests.

BPM / Business applications / Integrations / Document generation

Institutional knowledge assistance

Prepare relevant approved administrative guidance and summarize a service case for the responsible team.

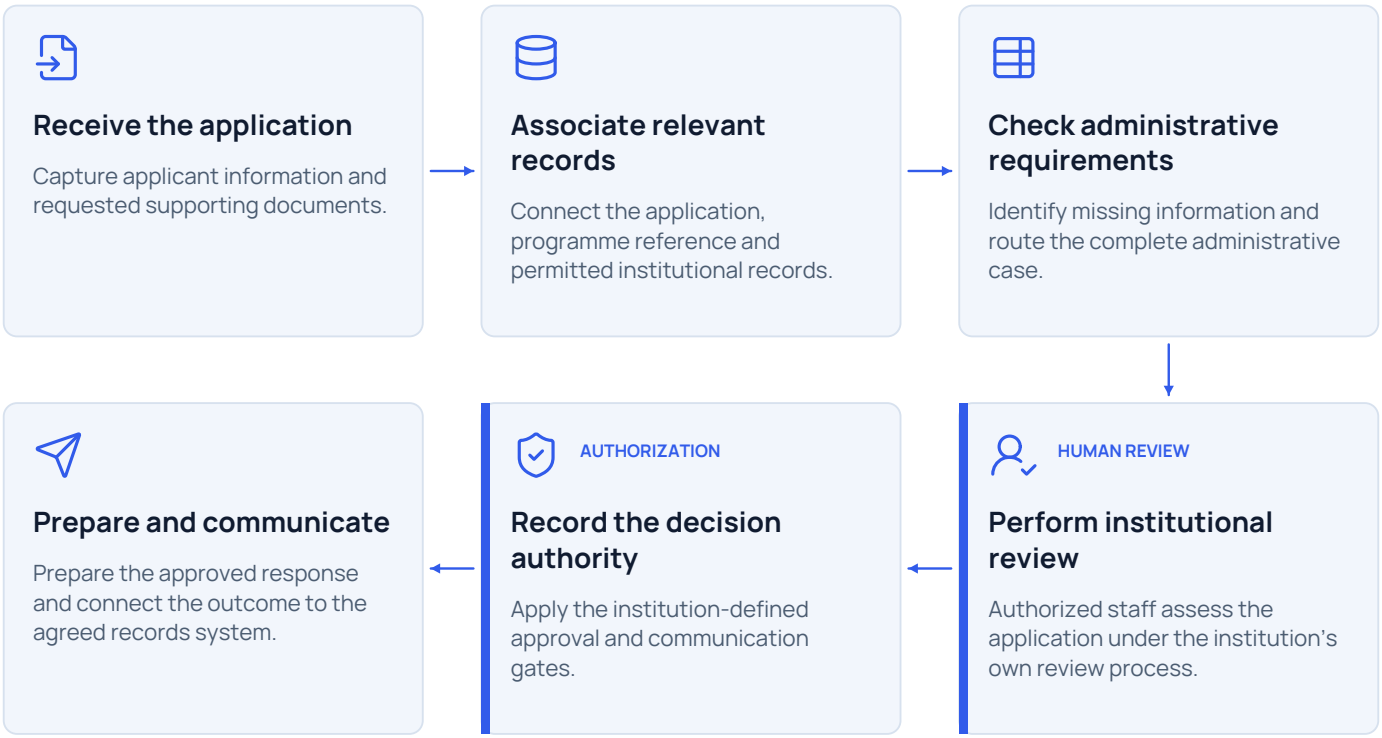

Contextual assistance grounded in permitted institutional information.

AI agents / Data fabric / Document management / MCP

JOURNEY AND DECISIONS

From request to accountable action.

An illustrative configured journey. Human review and authority are explicit parts of the design.

Illustrative application-administration routing

Submitted information	Required route	Owner	Next action
Incomplete	Administrative follow-up	Admissions office	Request missing information
Complete	Standard institutional review	Assigned reviewer	Review the application
Complete	Committee consideration	Designated committee	Prepare the review pack
Decision recorded	Communication authorization	Authorized office	Prepare the approved response

Administrative example only. Admissions, academic standing, scholarship awards and accessibility obligations are defined and assessed by the institution, not inferred by this table.

PLATFORM AND OPERATING CONTEXT

One platform. The context to act.

Sovereign AI, agentic automation and modern digital transformation. Connect the platform capabilities needed for your industry journey.

Enterprise context

Data models, relationships, data fabric, queries and permitted information.

Intelligence and business logic

AI agents, MCP, rules, BPM, lifecycles and human review.

Experiences and action

Interface Designer, applications, documents, integrations and operational insight.

Connect existing systems.

- Student information and admissions systems
- Institution-approved learning and service platforms
- Document, identity and enterprise finance systems

Define the controls.

- Keep selection and academic decisions with authorized staff.
- Use permitted records and clearly scoped AI assistance.
- Review applicant and student information boundaries.

See Inflow in your operating context.

Start with one admissions, student-service or institutional approval journey.
