inflow.ai

INDUSTRY SOLUTION

Inflow for Real Estate and Construction

Connect project information to accountable decisions.

Coordinate project requests, variations, contractor information and property-service cases. Bring documents, business rules, responsible teams and approved system updates into a connected operating journey.

CONNECTED INDUSTRY CONTEXT

The information behind the next action.

Illustrative industry information model

A project or property decision may depend on drawings, correspondence, commercial information and several reviewers. When these are distributed across teams, the approval context can be difficult to assemble. A connected case provides a structured route without replacing professional engineering, contractual or safety assessment.

INDUSTRY OPPORTUNITIES

Six journeys. One connected platform.

Configure the information, decisions and handoffs around the work your teams are responsible for.

Variation and change requests

Collect the proposed change, affected references and supporting assessments; route technical and commercial reviews before authorization.

A documented change journey with clear review and approval responsibilities.

Interface Designer / Lifecycles / Document management / Human approvals

Contractor and supplier onboarding

Coordinate organization-defined records, qualification reviews and commercial onboarding tasks.

A structured partner record before approved project engagement.

BPM / Data models / Rules engine / Integrations

Project document reviews

Connect submissions, correspondence, review comments and authorized document outcomes in a defined case.

Visible document dependencies and review ownership.

Document management / Human tasks / Lifecycles / AI agents

Property service requests

Capture tenant or owner service requests, associate property and asset references and coordinate responsible teams.

A connected service case from intake to reviewed completion.

Business applications / BPM / Integrations / Operational reports

Handover and completion coordination

Organize completion records, outstanding items, inspections and authorized handover approvals.

A clear administrative view of handover readiness and open work.

Lifecycles / Document management / Human approvals / Events

Commercial request approvals

Route purchase, payment-support or other commercial requests with relevant project context and configured authority limits.

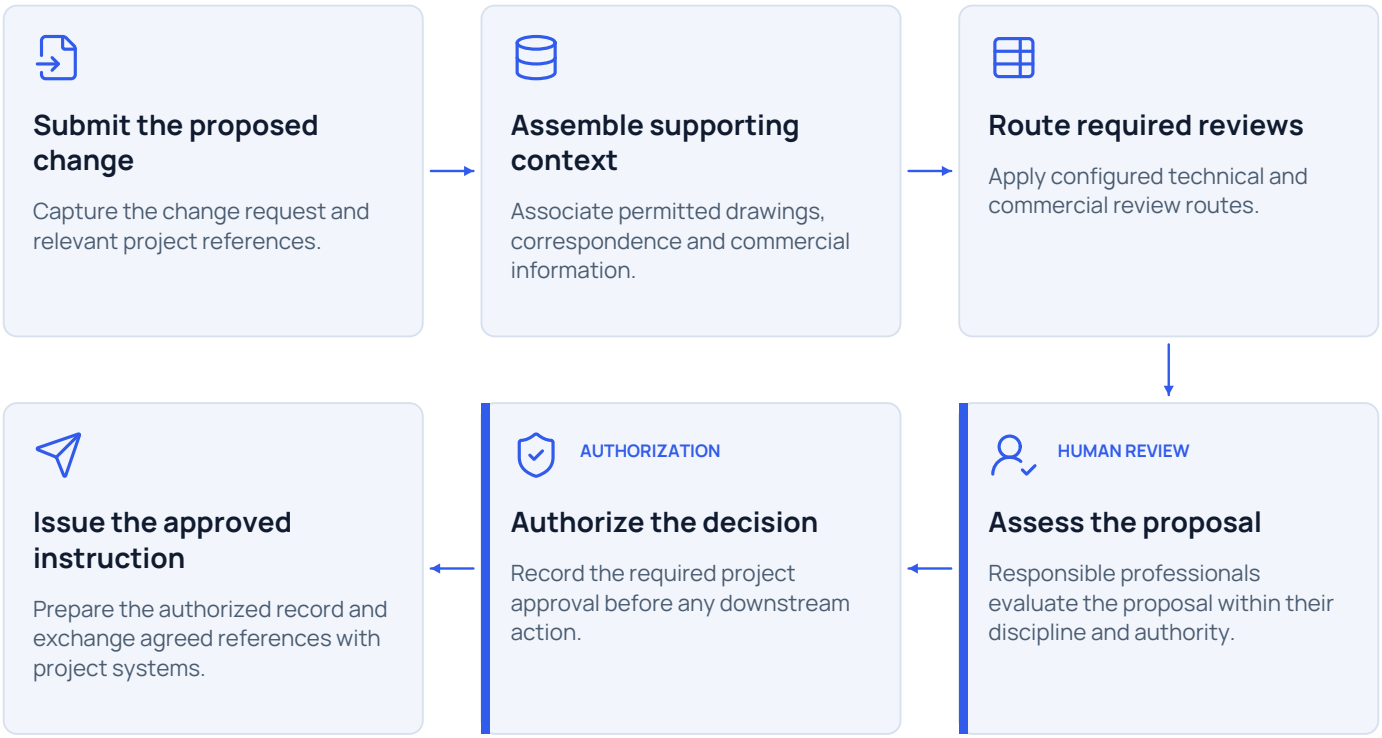

An accountable approval path before an agreed system handoff.

Rules engine / BPM / Document generation / Integrations

JOURNEY AND DECISIONS

From request to accountable action.

An illustrative configured journey. Human review and authority are explicit parts of the design.

Illustrative project-change routing

Submission	Required assessment	Owner	Next action
Incomplete	Not ready	Project coordination	Request supporting information
Complete	Technical	Authorized technical reviewer	Assess technical implications
Complete	Commercial	Authorized commercial reviewer	Assess commercial context
Reviews complete	Project authorization	Authorized project approver	Approve or return the proposal

Example coordination only. Contract interpretation, engineering approval, construction safety and payment authority require the appropriate qualified and authorized process.

PLATFORM AND OPERATING CONTEXT

One platform. The context to act.

Sovereign AI, agentic automation and modern digital transformation. Connect the platform capabilities needed for your industry journey.

Enterprise context

Data models, relationships, data fabric, queries and permitted information.

Intelligence and business logic

AI agents, MCP, rules, BPM, lifecycles and human review.

Experiences and action

Interface Designer, applications, documents, integrations and operational insight.

Connect existing systems.

- Project controls, construction and property-management systems
- Drawing, document and correspondence repositories
- ERP, procurement and contractor channels

Define the controls.

- Preserve technical, commercial and contractual authority boundaries.
- Keep controlled document references attached to review decisions.
- Separate approval records from physical-work authorization systems.

See Inflow in your operating context.

Explore a project change, handover or property-service journey.
